

Make a beautiful paper rose out of this page

Turn over this page for the instructions on how to make it . . .

How to make your paper rose

- 1) Cut out the spiral shape along the dashed lines.
- 2) Hold the central area in your fingertips and start rolling the spiral – for the best rose shape, try to roll it into a point at one end.
- 3) Once you have finished rolling the spiral, slightly pinch the end point to hold it together. Add a dab of glue to the pointy end and stick it on to a thin-ish twig.
TIP: Use a de-pointed wooden skewer if you can't find a good twig.
- 4) Pop it into a vase and spray with some perfume if you would like your rose to smell rosy!
