

MAKE A PAPER TOWN

To make your paper town, all you have to do is:

- + Carefully cut out all the pieces and fold along all the dashed lines.
- + Add a little glue to the glue tabs on one side and stick in place (where indicated) on the other side.
- + Slot together the trees and their supports as directed.
- + Place the buildings in a town-like arrangement and brmm-brmm! your bus around the streets.

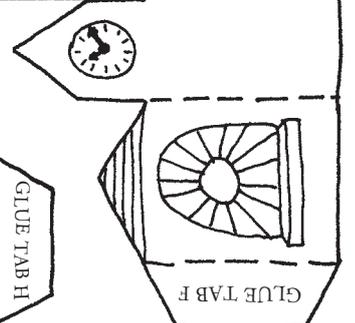

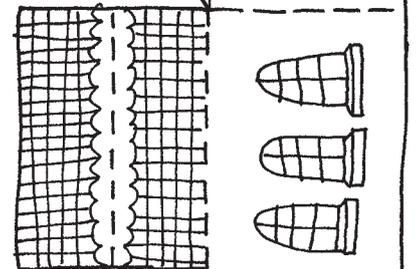

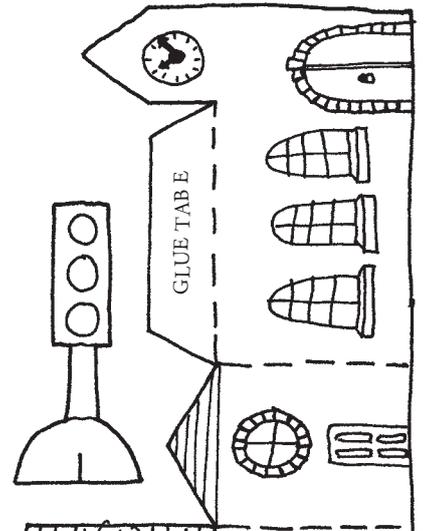

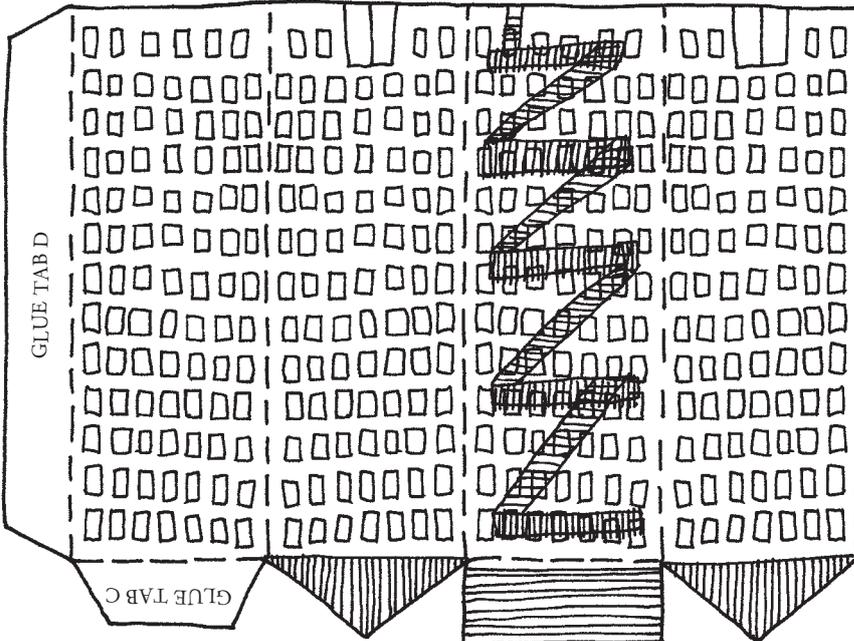

Snip the little notches in these trees as this is where the supports are slotted

A little bit of glue is needed on this bus's glue tabs, too

These are the tree and traffic light supports - snip the little notches on these pieces

The letters on this side show where to stick the glue tabs . . .

This is where your bus glue tabs should be stuck.
