

Marshmallow Catapult

Why not ask your friends to build a quick and easy marshmallow catapult with you? It will provide hours of squishy, safe marshmallow-flinging fun! Whose marshmallow will fly the furthest?

WHAT YOU`LL NEED

- seven wooden craft sticks
- five rubber bands
- plastic bottle top
- PVA glue
- mini marshmallows

STEP 1

Take five sticks and gather them into a neat pile. Wrap a rubber band around each end of the pile to hold the sticks together.

STEP 2

Place the pile sideways on top of another craft stick to form a cross shape.

STEP 3

Place another craft stick on top of the pile, lined up with the bottom stick. To secure, wrap two rubber bands around the centre of the cross shape where all of the sticks meet.

STEP 4

Wrap a rubber band around the top of the cross shape to keep everything in place and to form the catapult shape.

STEP 5

To make the marshmallow holder, glue a plastic bottle top to the top of the upper craft stick.

STEP 6

When the glue is dry, put a mini marshmallow in the bottle top. Set the catapult on a flat surface. Push down on the top craft stick, then release. Watch the marshmallow go flying!
